PROFESSIONAL SUMMARY

Analytical and detail-oriented MCA student with a strong mathematical foundation and hands-on experience in Python, Java, Machine Learning, and Data Science. Skilled in translating complex data into actionable insights through data preprocessing, model development, and visualization. Proven ability to collaborate effectively in team environments while writing clean, efficient code. Eager to apply strong problem-solving skills and a continuous learning mindset to contribute to software development and data-driven projects in a fast-paced organization.

TECHNICAL SKILLS

Programming Languages: Python, Java

Data Science & Machine Learning: Machine Learning, Data Preprocessing, Data Visualization, Jupyter Notebook

Databases & Tools: MySQL, Git, GitHub, Microsoft Excel

EDUCATION

Master of Computer Applications (MCA)

2025 – 2027 (Pursuing)

Cochin University of Science and Technology (CUSAT)

Bachelor of Science in Mathematics

2021 – 2024

Deva Matha College Kuravilangad, Mahatma Gandhi University

CGPA: 8.37

INTERNSHIP EXPERIENCE

Data Science and Machine Learning Intern — NEST Digital

May 2026 – June 2026

- Performed data preprocessing and cleaning on structured datasets, improving data quality and consistency for downstream analysis.
- Assisted in developing and testing machine learning models using Python, applying core algorithms to real-world datasets.
- Created data visualizations to identify trends and patterns, supporting clearer interpretation of analytical findings.

Intern — Corestone

June 2026

- Contributed to the development of AI-powered chatbot platform.
- Worked on integrating LLM to enable conversational AI capabilities.
- Collaborated with team members to troubleshoot issues and implement feedback.

PROJECTS

BudgetCoach — Personal Finance Management Website

- Designed and developed a full-stack personal finance web application to help users track expenses, set budgets, and build healthier savings habits.
- Built using Python (Flask) and SQLite, implementing secure user authentication, expense management, and budget-tracking modules.
- Implemented features including expense CRUD operations, daily and monthly spending analytics, and automated budget-limit alerts to improve user financial awareness.
- Added a goal-setting and progress-tracking module along with a gamified rewards system to boost user engagement and consistency.
- Owned end-to-end development including database schema design, backend logic, and front-end interface, delivering a functional and user-friendly application.

CERTIFICATIONS

- Data Science — Duke University (Coursera)
- Voice of Stakeholder (VoS) — Young Innovators Program 2022, Kerala Development and Innovation Strategic Council (K-DISC)
- Python Programming — Youth Employability Skill Training Co-operative Educational Society Ltd.
